

Paragon 5 Release Candidate 1 (RC 1) and URL Update

Agent Release (RC 1) deployed to all customers: November 9th, 2010

Recommended Membership

Release: Monday, November 15th

With the Release Candidate 1 of Paragon 5 we are pleased to announce full LPS Customer Care support for your membership. Along with this release the new Paragon 5 URL will be available for use. The former “fnismls” has been changed to “paragonrels” (“rels” stands for “real estate listing service”). This change ensures consistent naming by removing the use of the company name within the URL.

Important: If the original URL address for Paragon 5 is utilized (“YourMLS”.fnismls.com/paragon5) users will be redirected to the current URL for your MLS. However, we strongly recommend promotion and use of the new URL.

The following will be the new format for your Paragon 5 URL address:

“YourMLS”.paragonrels.com

Example: imls.paragonrels.com

(the Paragon 5 system for Intermountain MLS)

Both your current Paragon 4 and Paragon 5 sites will continue to share the same database. Paragon 4 will remain operational throughout the final phases of Paragon 5 deployment.

Upon finalization of Administration LPSREG will work with you to schedule the complete transition from Paragon 4 to Paragon 5.

What Do I Need to Do Next?

- Visit Admin.paragonrels.com (**MLS Admin Only**) for all the information you need to support the release of Paragon 5 to your membership. This site contains useful information and e-mail templates for member communication.
- **Begin to formulate a communication plan for releasing access to Paragon 5 to your full membership.**
- **Attend scheduled Paragon 5 Webinars. Sessions are now being conducted. Reserve your space for you and your staff today!**
